Hardener

The choice of the suitable hardener must be made based on the work to be performed. For a few panels / small surfaces it is possible to use the standard hardener code 4376. We do not recommend using this hardener at high temperatures and on flat and large surfaces. For complete painting / many panels, with high temperatures and on flat and large surfaces, we suggest the use of slow hardener code 4386.

Small or medium restore (1 - 5 panels)

Use the hardener
STANDARD UHS cod.4376

Total restore or in case of high temperatures

Use the hardener
SLOW UHS cod.4386
